

SNAPSHOT: PRODUCT PARTNER

## Internet2 + LastPass

Simple and affordable password management for your institute.

Higher education is ranked one of the top 5 industries to experience significant data breaches in 2020, with 23% of breaches due to hacking via stolen credentials, compromising personal data.<sup>1</sup>

### Custom I2 Packages to meet your needs - and budget

Each year budgets get tighter and resources slimmer as your responsibilities grow. For higher education institutions, LastPass and Internet2 offer turnkey, affordable packages designed to make it easy for higher education institutions in the US, to provide secure password management for everyone on and off campus.

Internet2 NET+ LastPass for your higher education institution includes a personal LastPass account for everyone on and off campus.

### Digital security for all

Professional and personal lives are merging at unprecedented rates, and it's crucial that all faculty, staff and students protect their digital life - especially when accessing your institute's data, like email and learning apps, from personal devices on and off campus.

Reduce the cyber risk to your institute by securing your employees, students, and their networks! Every individual on -and off campus can sign up for a personal LastPass account to ensure a holistic security strategy at your higher education institute. With a secure, private vault that's accessible from any device and browser, there's never an excuse for poor password hygiene.

### Frictionless experience for users of all levels

Keep things simple yet secure. With easy to use web extensions and mobile applications, let LastPass do the work for you, so your staff and faculty can focus on important initiatives and students can focus on academics. Users of all levels know exactly where to go, and how to get access.

**Vetted  
by I2**

**Autosave  
and autofill**

**Access  
everywhere**

**Generate  
strong passwords**

**Share  
effortlessly**

### Proven security model

LastPass is a trusted Internet2 partner, and we take your security seriously. At every step, we've designed LastPass to protect what you store, so you can trust LastPass with your sensitive data.

LastPass is Soc 2 Type II, Soc 3 Type II and C5 compliant. This detailed review of our controls and processes is a gold standard for confirming the security and reliability of LastPass.

### Secure campus while reducing IT burden:

- LastPass reliably captures every password at login, and fills them in during the next visit.
- Whether on a desktop, laptop, smartphone or tablet, accounts are backed up and synced.
- The built-in password generator creates long, randomized passwords that protect against hacking.
- Conveniently and safely share passwords and notes with anyone.
- LastPass has 1,200+ pre-integrated apps and custom integrations provides seamless access without passwords.

### More accessible for every user

LastPass has enabled keyboard navigation, updated proper color contrast and readability, and has added regions and language tags to allow users to navigate with screen readers and keyboards more easily within the vault navigation across three main browsers.

### Trusted by academia

LastPass' password manager is trusted by your peers in Academia, with over 1,200 higher education customers and counting such as Auburn University, Dartmouth College, Princeton University and more!
