

G2 2023 Summer Report

Password Manager Software

Grid® Report for Password Manager Summer 2023

Grid® Report for Password Manager | Summer 2023 is based off of scores calculated using the G2 Grid® algorithms from reviews collected by May 23, 2023.

★★★★★

"I love the integration across all my devices and the ease of use to add and update user IDs and passwords. I also appreciate the security features that guard my accounts and notify me of duplicate or exposed passwords."

— G2 reviewer

★★★★★

"LastPass is a game changer! LastPass is hands down the best way to manage login information, payment card details, secure notes and much more. I am able to launch all of my important accounts and apps with one keystroke and retrieve any of my important confidential information immediately. Such a huge time saver!"

— G2 reviewer

Quality of Support

Ease of Use

★★★★★

"We share a lot on my team, including company social accounts, access to tools, and collaborative software. Using LastPass makes it simple to access company accounts without putting security at risk."

— G2 reviewer

★★★★★

"LastPass has been a lifesaver for me. Its intuitive and easy-to-use interface, coupled with essential features such as encrypted password sharing without sharing passwords or weekly resets, have made my life easier on numerous occasions. I love how LastPass streamlines the process of inviting team members onboarding and generating usernames as needed; it's a worthwhile investment once you've eliminated the paper notes with potentially confidential details lying around someone's desk. You won't even remember the passwords you create using the password generator - so your accounts are secure."

— G2 reviewer

Meets Requirements

Ease of Admin

★★★★★

"It works on multiple devices and multiple browsers. It is very convenient to have the LastPass browser extension installed. Every time you create any new account somewhere it catches your username and password and offers to add this site to your vault in the cloud. It also offers to generate a random password for you. Every time you change the password it asks if you want to update it in the vault. It also offers passwordless login options using Push notifications and an authenticator app on your mobile device. You always have a local version of your vault on your device which is synced to the cloud."

— G2 reviewer

★★★★★

"LastPass mainly serves as our password manager however is also leveraged for password sharing, MFA, and SSO which has served to make me more efficient and effective."

— G2 reviewer

Ease of Doing Business With

Ease of Setup

★★★★★

"I've been using LastPass for a few years and see others recommending different tools but LastPass has always been a dependable piece of software that just works whenever and wherever I need it. My passwords have always synced beautifully between my laptop, phone, and iPad. By using the browser extension, I can easily fill any login information I need as well as generate strong passwords for new accounts. Add in the ability for me to categorize my logins and take notes, it's a huge win for my business and saves me tons of time every day."

— G2 reviewer

Password Generator

Two-Factor Authentication

Browser Extension

★★★★★

"LastPass makes it incredibly easy to utilize completely random passwords, not have to remember a single one of them, and use completely different passwords across all of your accounts. Their mobile app is incredibly responsive and works with all of my apps and their browser extension provides quick and easy access to all of my login information."
